

Terms of use of data gathered by the Greenland Ecosystem Monitoring (GEM) programme

1. GEM datasets are open data and can be accessed by anyone through <https://data.g-e-m.dk> at no charge. This is the official source. Annual updates with corrections and the latest collected data are published to this repository.
2. All use of GEM data should be initiated by an individual data request in the GEM online platform <https://data.g-e-m.dk> . If a dataset has already been used once and a new study is begun, please make a new data request to ensure that you work with the the latest version of the data set and for the benefit of our usage statistics.
3. If the data are presented or used to support analysis of any kind that will be published, please inform the relevant sub-programme manager (<https://g-e-m.dk/gem-programme-managers-and-logistics/>) and the GEM secretariat (<https://g-e-m.dk/contact/>). We can help ensure that GEM data are correctly understood by the user and can assist in the other phases of the writing process as needed.

Creative Commons License

GEM datasets are shared under the terms of the CC-BY-SA 4.0 license:

<https://creativecommons.org/licenses/by-sa/4.0/> .

Citation and appropriate credit to Greenland Ecosystem Monitoring must always be respected.

How to cite

In cooperation with DataCite and the Danish e-Infrastructure Center (DeIC) GEM are assigning Digital Object Identifiers (DOI) to all datasets. The DOI must be used in the citation. If you are using multiple GEM datasets, cite each of them individually.

When you download a dataset, formal citation information, including DOI, is included in the download.

Additional Credits

In addition to the formal citation, consider to include a notice that mentions the providers of the GEM data:

For ClimateBasis data: *Data from the Greenland Ecosystem Monitoring Programme were provided by Asiaq – Greenland Survey, Nuuk, Greenland.*

For MarineBasis data: *Data from the Greenland Ecosystem Monitoring Programme were provided by the Greenland Institute of Natural Resources, Nuuk, Greenland in collaboration with Department of Bioscience, Aarhus University, Denmark and University of Copenhagen, Denmark.*

For GeoBasis data: *Data from the Greenland Ecosystem Monitoring Programme were provided by the Department of Bioscience, Aarhus University, Denmark in collaboration with Department of Geosciences and Natural Resource Management, Copenhagen University, Denmark and Asiaq – Greenland Survey, Nuuk, Greenland.*

For BioBasis data: *Data from the Greenland Ecosystem Monitoring Programme were provided by the Department of Bioscience, Aarhus University, Denmark in collaboration with Greenland Institute of Natural Resources, Nuuk, Greenland, and Department of Biology, University of Copenhagen, Denmark .*

For GlacioBasis data: *Data from the Greenland Ecosystem Monitoring Programme were provided by the Geological Survey of Denmark and Greenland (GEUS), Denmark and Asiaq – Greenland Survey, Nuuk, Greenland.*

If the data are crucial to the main conclusions of a manuscript or presentation of any kind please include a relevant member(s) of the GEM programme in the author list. We also appreciate it if you cite key publications by the GEM programme. Consult with the GEM secretariat.

Disclaimer

Despite our confidence in the quality controlled data in the GEM database no party involved in the Greenland Ecosystem Monitoring Project carries any legal liability in relation to these data.

Feedback

Please report any problems and suspected errors to the GEM secretariat (<https://g-e-m.dk/contact/>) or directly to the relevant sub-programme manager (<https://g-e-m.dk/gem-programme-managers-and-logistics/>).
